

## Spanish Lingua Fall Session 2017

We are now accepting registration for the Spanish session. This opportunity is for 4 and 5 year olds. Music Lingua is a program that uses music, movement, drama, art and storytelling to teach children foreign languages. This program teaches Spanish in the same way we learned our mother tongue: by hearing the language and its new and different sounds, and responding to commands first physically, then verbally.

Along with the class, you will receive a CD and bi-lingual lyrics booklet. To make the most of this opportunity for your child and to help them learn as much as possible. Your child will become familiar with the music so that when the songs are presented at school, he/she will already be familiar with them. If you ask your child about the meaning of the songs they will be proud to tell you the words they already know. If you have a chance, go through the lyrics book and familiarize yourself with the songs so you can enjoy them together. Showing interest will build their confidence in the language.

Advantages of learning a second language early:

- An infant's brain comes hard-wired for language.
- Millions of connections are waiting to be made in their brain
- Multiple languages are very easy to pick up at this time.

By the age of 8-years-old, this window of opportunity begins to close, and it's much harder to learn a second language. Children that learn foreign languages tend to have a better grasp of their mother tongue, do better in math, and have better problem solving and analytical skills. That's why Music Lingua teaches children from ages 0-8 years old: to plant the ability at a young age, so they can benefit from it their whole life!
